

STREAMPAY

Enterprise Supply Chain Risk Monitoring and Payment Tracking Solution

The Problem

Companies' supply chains are now global, and they depend on the global supply chain to deliver goods and services to their end customers. Companies are looking for ways to better manage their logistics processes, transportation, inventory management, and quality assurance.

The Solution

StreamPay is an enterprise supply chain risk monitoring and payment tracking solution that uses blockchain smart contracts to manage suppliers and finished goods. StreamPay technology keeps distributed ledgers to create articles to insert into smart contracts so supply chain manufacturers, suppliers, vendors, logistics companies, and customers can track goods and services from the raw materials to the finished product using QR codes and digital signatures.

The web platform already has hundreds of users issuing audits, monitoring their supply chains, and assessing risk. To view a demo of StreamPay please visit <https://app.streampay.io>. There are instructions on how to access the demo.

STPY Crowdsale

Our token sale starts on 1st September 2018, at StreamPay.io. 50,000,000 STPY tokens will be distributed during the token sale period. Pre-sale starts 30th June 2018.
